

Boilermaker Role

Are you a trade qualified Boilermaker with great fabrication skills?

Do you thrive in a fast-paced work environment?

Are you the type of person who takes pride in their work, keeping their workstation tidy and adhering to OH&S standards?

And are you able to interpret engineering drawings?

If you answered yes to those questions, then we'd love to hear from you!

AustEx is a manufacturer at the forefront of the land-based exploration industry, specializing in the design, construction and maintenance of drilling rigs and related equipment. We are proud of having developed novel designs to improve the safety, reliability, and production of drilling operations around the world.

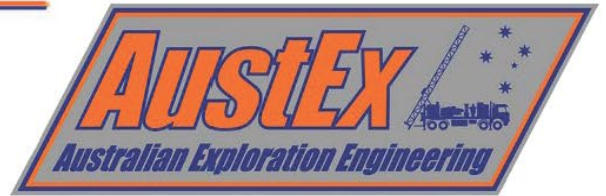

We have recently moved into our new purpose-built facility in Forrestfield to improve our manufacturing and engineering capability. We are now looking for another person who can bring their existing experience to help move the company forward another step.

Our core services include conceptual design, research and development, drafting, engineering, manufacturing, maintenance, and repair.

As an organisation, we place a great deal of importance on our company culture. We've worked hard to create a relaxed, flexible, and therefore quite enjoyable working environment. We have a tight-knit team, with many of us having worked together for over 10 years.

And now we're looking forward to inviting our next team member to join us. We're looking for an amazing new Boilermaker to join our team.

You'll be working in our warehouse and the role will involve all aspects of fabrication, marking out, tacking, welding, etc. It will also require the ability to read engineering drawings.

If this sounds like the role you're looking for and you choose to apply, here's what you'll be saying yes to:

- All aspects of fabrication (marking out, tacking, welding, and finishing jobs to a high standard)
- Interpreting engineering drawings in order to complete jobs.
- Use of various machine tools and hand tools in the manufacturing process
- Keep correct housekeeping in your work areas.
- Working in a fast-paced environment
- Working as part of a team

And here's what we require from you:

- Trade qualified
- Prior experience as a boilermaker
- Ability to interpret engineering drawings.
- Ability, and desire, to be part of a team.
- Excellent communication skills
- Great attitude and work ethic
- Forklift ticket is advantageous but not required.

If this sounds like you and you'd like to apply, please do so via Seek.
We look forward to hearing from you!
