

Drill Rig Mechanical Fitter

We have Leading hand, Team leader and Experienced Drill rig fitters roles available.

5 Key Points:

- Team environment, with flexible/family-friendly hours.
- Excellent remuneration, with additional quarterly profit share incentive scheme.
- Support to further your education & career.
- Perth based work in our brand-new purpose-built workshop in Forrestfield.
- 45 to 60 hrs. per week available with attractive penalty hourly rates.

Do you have a mechanical trade or diesel fitter qualification?

Have you worked on exploration drill rigs in the past?

Do you have expert knowledge of diesel engines, hydraulic pumps and air compressors?

Are you someone who places a great deal of attention on safety? So it's not something you do because you "have to" but rather because you see the importance of it?

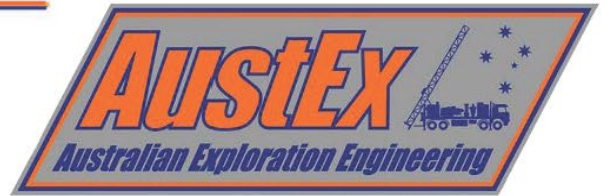

And do you enjoy working in a team environment, collaborating with others to get things done?

If you answered yes to those questions, then we'd love to hear from you!

AustEx is at the forefront of the mining sector, specialising in the design and manufacture of exploration drilling rigs and associated equipment. Our core services include conceptual design, research and development, drafting, engineering, manufacturing, maintenance and repair.

In the 13 years we've been in business we've gone from strength to strength to land where we are now, a company with well established projects and a large pipeline of work with major clients throughout the mining industry.

In our organisation, we place a great deal of importance on our company culture. We've worked hard to create a relaxed, flexible, and therefore quite enjoyable working environment. We have a tight-knit team, with many of us having worked together for over 10 years.

And now we're excited to invite our next team member to join us. We're looking for our next Drill Rig/Mechanical Fitter to join us as we grow. This person will be responsible for the assembly of new drill rigs and equipment, as well as maintenance and repairs on customers' existing rigs. You'll be primarily working from the warehouse, currently located in a new purpose-built facility in Forrestfield.

If this sounds like a role you'd enjoy and you choose to apply, here's what you'll be saying yes to:

- Full time work
- Assembly of new drill rigs and equipment
- Maintenance and repairs on customers drill rigs and associated equipment
- Ensure a safe working environment
- Being proactive with OH&S practices and procedures
- General maintenance tasks as required

Here's what we require from you:

- Diesel fitter or mechanical trade qualification is essential
- Previous experience working on exploration drill rigs
- A strong understanding of diesel engines, hydraulic pumps and air compressors
- Forklift and overhead crane ticket preferred
- Understanding of maintenance systems and procedures
- Adherence to all OH&S standards

If this sounds like you and you'd like to apply, please do so via Seek.

Your application will include the following questions:

How many years of Drill Rig fitting experience do you have?

How many years' experience do you have as a mechanical fitter?

Do you have a current Australian driver's licence?

We look forward to hearing from you!
